- Plate Work
- Structural Steel
- Bridges
- Cladding & Caravans
- Machining & Irrigation Gates
- Commercial Vehicles

Plate Work

Al-Fath Company has exceptional capabilities for manufacturing the plate work projects, as it has a great experience and big range of equipments which enable to work in any untraditional steel project requiring special capabilities.

Structural Steel

Whether it is a pre-engineered building (PEB) for an industrial facility, an airport, a cold store, a multi-storey residential building, a truss system, a platform, or any other form of steel constructions, El-Fateh is your one-stop-shop for design, detailing, fabrication, coating, erection, and after-sales support. Our client list includes major companies in the construction sector, oil and gas, cement industry, power plants, renewable energy, etc.

Structural Steel

Cladding & Caravans

For more than 35 years, El-Fateh Company has been proud of its cladding products selling and erecting roof and wall panels in terms of millions of meters. The company operates a state-of-the-art sandwich panels line, has its own standing-seam cladding system, and has an extensive experience in pre-fab units, caravans, shelters, and cold stores.

Bridges

El-Fateh is an expert in steel bridges. Some of its references contain 60-meter cambered bridge spans, 3-m high girder beams, and 50-ton weight of the single beam.

Machining & Irrigation Gates

El-Fateh operates a mechanical workshop with some unparalleled machining capacities. We have been utilizing those capacities in the machining of irrigation gates and stop logs, production lines, flanges, spare parts, molds, etc.

Commercial Vehicles

Commercial vehicles are an important addition to El-Fateh's business lines. The company produces different types of commercial vehicles including: trailers, semi-trailers, tippers, silos, etc.

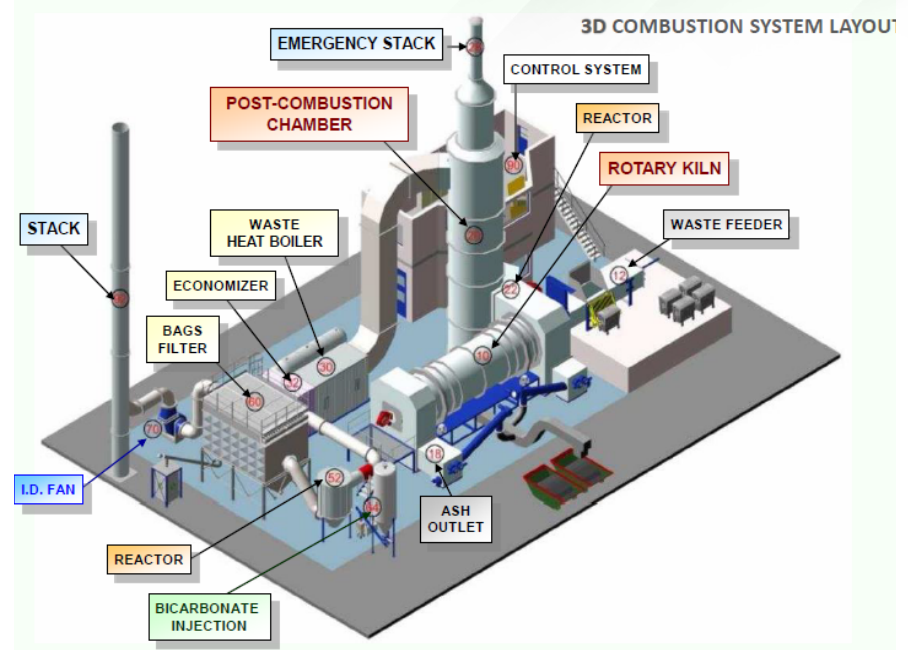

PROIMPIANTI

It is an Italian Company that Works in the field of Manufacturing the waste incineration units for residential and industrial complexes.
